Planning and Assessment Tools
Practical, comprehensive, useful

Planning and Assessment Tool Kit
Ripple Effects offers an easy-to-use set of planning assessment apps for creating individual and group interventions, and individual and group self-report tools for assessing social-emotional and behavioral strengths and school climate.

Planning

Individual Personalized Playlist Creator
This app allows staff to customize skill-building for their student by matching lessons from Ripple Effects research-based treatment plans to their student's learning objectives. Seamlessly connected to the Data Viewer, it is easy for users to quickly see what lessons students have completed. Treatment plans are designed to solve behavior challenges by addressing presenting behavior, and the reasons behind it. A personalized learning plan made up of multiple lessons can be spread out, or compressed, to fit a range of time constraint

Group Playlist Creator
This app allows implementers to tailor a curriculum to any group of students thy define, and allows assignment of preset curricula or specific topics to groups of students. The customized group playlists will then show up in each student's individual playlist in the student intervention program. At the end of the year, teachers or schools can evaluate the implementation by referring back to original goals and examining measures of success or progress, as well as decide on necessary adjustments based on changing circumstances.
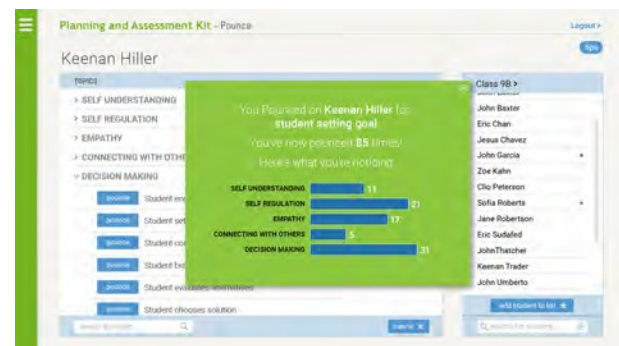

Assessment

Individual
Screen for Strengths
Identify strengths and opportunities for growth, and monitor progress toward targeted social-emotional competencies with this student self-report tool. Screen for Strengths aids educators in directing students to personalized, targeted interventions and reduces legal exposure possibly due to subjective, culturally biased assessment.
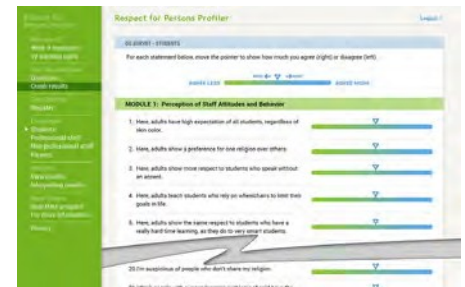

Group
Seeing I to I

Identify potential trouble spots and build positive school climate with survey tool. Separate online surveys capture student, staff and parent perspectives of bias. The surveys focus on three areas related to respect: perceived adult behavior toward diverse groups, perceived student behavior toward diverse groups and personal attitudes about diversity.

Program management tools
Individual

Adminstrator's can manage individual educator's viewing and editing privileges to support student privacy.

Group

Educators can upload lists of student information from a spreadsheet with the "Import" feature. The "Groups" feature then allows users to organize student names in to lists for assignment via the playlist creator apps.

RE Suite of Screening Tools

SCREENING LEVEL		WHO DOES IT Student or Educator	WHAT IT MEASURES
INDIVIDUAL	**Self-report**		
	Screen for Strengths	S	Core SEL competencies
	Profiles	S + E	Two dimensions of attitudes or skills
	Journal (Brain)	S + E	Deep self assessment
	Got it	S + E	Mastery of lesson concept
	Observational		
	Pounce	E	Makes note of positive behavior
	Individual Planning Tool	E	Identifies strengths and areas for growth
GROUP	**Self-report**		
	Site-wide Implementation Planning Tool	E	Identifies implementation variables
	Seeing I to I	S + E + Community	3 areas related to respect
